## EXPERIENCE

### •PROJECT:

I talk about my project work so I created a logo design for enterprise as a project work. first of all I research different places on the net according to the needs of the client. Then I start to create logo according to client briefs and I used Adobe Photoshop and illustrator software for logo and business card design. During the process I faced challenge to designing with consideration for different printing methods and materials. And it's solution to understand the printing process and material options. And then I present final design with mock-up. And during Also designing I learned the importance of flexibility and problems solving and also Typography, layout etc.
